QUANTUM PROFILE SYSTEMS LTD
ISO9001 – QUALITY POLICY STATEMENT

QPSL

Quantum Profile Systems Ltd is based at Salmon Fields, Royton, Oldham. The company manufactures various products from polyvinyl chloride (pvc) and aluminium for use in the construction industry. The key manufacturing process is extrusion of pvc.

It is the policy of Quantum Profile Systems Ltd to provide its customers with products that have been designed and manufactured to ensure that they are suitable for their intended purpose.

The company operates to a documented process supported by a Quality manual and associated procedures, which describe the functions and duties which must be performed in order to achieve these quality standards. Quantum Profile Systems Ltd sets objectives at all levels of the company in order to achieve desired business goals and improve the Quality system in place.

These objectives, goals and improvements will be achieved by providing all employees of the Company with the necessary training, information, equipment and materials in order that they will 'get it right first time' and thereby meet the requirements of the customer. This will be supported by continually reviewing all aspects of the business in order to identify areas for improvement and to then implement the appropriate changes.

The very nature of Quality Assurance makes it impossible for this Manual to be totally comprehensive. However the Company publishes the Manual in the knowledge that only the everyday actions of all concerned can affect the quality of its customer service and on which its good name depends. All employees, customers and suppliers are encouraged to make suggestions for improvement to any aspect of the business.

Clive Bowen (Managing Director)
