

Customer - PDS Doorsets Main Contractor - Calco Flooring

CHALLENGE

Firmly established as a leading supplier of Secured by Design, PAS 23 & PAS 24 high performance and FD30 & FD60 fire doorsets to the Social Housing refurbishment sector, PDS also supply bespoke doorsets into the new build and home improvement markets, providing a fully integrated package from initial concept, through design, manufacturing, supply, installation and after care. The company was looking to refurbish the office area at its headquarters in Littleborough in order to project a more professional appearance to potential clients and other visitors. Key drivers for the project were the creation of a safety optimised and aesthetically pleasing staircase.

PDS Doorsets

/// Q Range offered a safe solution for an extremely heavy traffic staircase linking our production facility with our offices ///

SOLUTION

Quantum's new Q Range provided the perfect solution for PDS as the product's all over tread ensures that users always make contact with the slip resistant tread material, a unique innovation for the UK stair nosing market. In addition the combination of polar grey tread material and satin etched, scratch resistant riser gives a highly attractive finish.

Q Range also minimises maintenance and maximises green credentials by combining smooth surfaces which negate the risk of dirt traps with design geared around lean manufacture as well as optimal packaging and recycling potential.

The unique features provided by Q Range offer a complete stair nosing solution and they have resulted in an extremely safe and easily maintained staircase which will continue to meet the demanding requirements of day to day foot traffic for many years to come.

RANGE
green ■ safe ■ clean

PROJECT SPECIFICATION DETAILS

- » Office refurbishment project
- » QR-HF1 Polar Grey
- » 30 linear metres installed
- » Fitted with carpet tile
- » Product requirements defined using QSMS measuring service
